

2019 Community Summit on Children

On **May 10, 2019**, our community will reconvene to host the 5th Annual Community Summit on Children. The Summit is a community driven event created to increase public/private business awareness, engagement and investments in early childhood programs that will drive better outcomes for our children and families, and ultimately the future of Leon County. Because of the extraordinary feedback and community support received, the Summit was expanded in 2016 to Family First -a week - long series of events focused on educating community leaders on collaborative ways to promote child well-being.

In its first four years, nearly 4,000 community professionals - including business owners, social workers, law enforcement, attorneys, judges, mental health professionals, the pediatric medical community, school personnel, childcare providers, child advocacy center personnel, and the faith-based community - attended Family First events to learn from national, and regional experts on important issues related to child success. Our vision is to grow the Summit into the preeminent conference in the Big Bend region, and we are well on our way to achieving this goal.

We welcome any opportunities from community stakeholders to support the success of the Community Summit on Children and Family First Week.
